

Software Quality Assurance Engineer

Reports to: Rob Duckworth
Department: IT
Location: Dallas, TX
Compensation: Competitive

Who are we? Our firm is one of the industry's top providers of institutional agency brokerage services and independent research. For over 30 years, we have provided agency trading and independent investment research products to investment managers and plan sponsors. We are an independently owned brokerage firm which allows us to address the diverse needs of fund managers, money managers and broker-dealers alike, while remaining objective and unbiased when it comes to providing the best possible execution services. We offer global equity and fixed income trading and are a member of the New York Stock Exchange, FINRA, and SIPC.

Who is our ideal candidate? Our ideal candidate would have:

- Bachelor's degree
- Software QA experience a plus
- Knowledge of FIX protocol a plus
- Experience with testing tools
- Team player

What are the job duties and responsibilities?

- Creation, execution and modification of test plans, cases, scripts and scenarios to demonstrate the impact future releases will have on multiple systems
- Performing testing (manual and automated) including the following:
 - Regression testing
 - Functional testing
 - Business scenario testing
 - Stress testing
- Analyzing and troubleshooting potential defects
- Maintain documentation of test results to assist in debugging and modification of software
- Participate in meetings with QA and Development

What else can we tell you? We offer a competitive compensation package that includes health and dental benefits, 401(k) plan, life insurance, long-term care and opportunities for professional growth.
